

# Values

## Fellowship

We work as *one* team. We trust each other in our daily collaboration. We are there for each other, both in celebration and in difficult times.

#1

## Passion

We put energy and commitment into our work and approach our tasks with same attention and seriousness, whether they are internal or external.

#2

## Safety

We listen to and trust each other. Interest, humor, respect for diversity are important factors for an everyday life with open dialogue in a safe environment.

#3

## Talent

We see the potential – both in ourselves and in the people we meet. We wish to create the best environment to develop our own strengths, but also attract skills from outside and put their abilities in play.

#4

## Wholeness

Above all, we are all human beings, and we recognize that life at work interacts with life outside work – and vice versa.

#5

## Curiosity

We recognize that curiosity is the foundation of our success. Therefore, we ask questions to understand the full picture and provide the best solution.
